

# Slug Life Hat Instructions

1. First off, you want to take the metal clothes hanger and bend it into the shape of the Slug eyestalks, while also creating a support band that will hold the eyes up on top of the wearer's head.
2. Next, wrap the eyestalks with black electrical tape. You don't have to use electrical tape, but it does give the eyestalks a slightly shiny look, and that helps give it the Slug feel.
3. After cutting holes into the orange hat, put the metal wire into the hat. Use hot glue to seal it in place under the fabric. Make sure it's cooled off before putting it on.
4. Following the pattern found in the link in the video description, cut the eyebrows out of black felt. You can also cut out the "SLUG LIFE" circles and letters while you're at it.
5. Add on the Styrofoam balls to the eyestalks, and make sure cut out two small circles out of felt for the pupils!
6. Once you've got that all cut out, hot glue them together and add them to the eyes & hat! Then you're done!
